

8 questions to consider when choosing an ABA provider

1 Where will sessions take place?

*Will there be an opportunity for skills to be generalized to the community?
If so will the company provide transportation or will parents need to provide this?*

2 How does the provider determine the number of treatment hours my child will receive?

3 What will family involvement entail?

How often will parent training and support occur and in what setting will this occur?

Is the ABA provider considerate of your whole child's wellbeing and how ABA will effectively blend with your entire family?

4 Will I see my BCBA in-person or will BCBA support only be remote?

In general, how often would I expect to see their BCBA each month?

5 What does the day to day session typically look like?

6 How is data collected and analyzed to monitor my child's progress?

7 What is the process for terminating services and ensuring a smooth transition to other environments?

*Do you have resources to recommend when transitioning?
Are you open to collaboration?*

8 How long have you been serving in (town name) / my community?

Does the provider value a local, ABA perspective for your child's care?
